PROJECTS

E Commerce | *JavaScript, RESTful API, MongoDB, NodeJS, EJS, Bootstrap* 2024

- Developed a full-stack e-commerce website using HTML, CSS, and JavaScript for the front end, Node.js and Express.js for the backend, and MongoDB with Mongoose for the database, implementing RESTful API architecture for seamless communication between client and server.
- Implemented CRUD (Create, Read, Update, Delete) functionality for products, enabling seamless management of product listings, leveraging RESTful API architecture.
- Integrated user authentication, product management, and shopping cart functionality, leveraging MongoDB to store and retrieve data efficiently, demonstrating proficiency in both front-end and back-end web development, as well as database management

Weather App | *HTML, CSS, JavaScript, API, GSAP* 2024

- Developed a web application to fetch and display weather information based on user input
- Provided current weather conditions, temperature, humidity, wind speed, and a 5-day forecast.
- Designed a responsive layout for optimal viewing across various devices.

Brainwave | *React.js, Tailwind CSS, Vite* 2024

- Created a UI/UX project featuring beautiful sections including hero, services, features, how to use, roadmap, pricing, footer, and header.
- Ensured seamless functionality and aesthetics across all devices with a responsive design
- Incorporated the latest UI trends such as bento grids and stylish gradients for cards and buttons.

Snake Game | *HTML, CSS, JavaScript, Canvas API* 2024

- Classic Snake game mechanics with intuitive controls.
- Responsive design for both desktop and mobile play.
